

REPAIR AND RECONDITIONING

Feel confident securing premium quality at a fraction of the cost of new equipment through repaired or reconditioned options offered by American Industries. As a leading provider of railcar repair and maintenance components, our business caters to railcar repair shops, rip tracks, private car owners, and Class 1 railroads across North America. With a commitment to excellence, we ensure that our customers receive top-notch products and services that meet their specific requirements. Choose American Industries to access exceptional value without compromising on quality.

We provide a wide range of options to fulfill your needs promptly and within budget, including new, secondhand gauged, and reconditioned parts that are fully certified. Our reconditioning stations are equipped with advanced burning, grinding, and multi-process welding equipment, ensuring that we meet all of your requirements. Each of these stations are equipped with AAR-approved gauges to guarantee compliance with AAR standards.

Our bolster and side frame stations are equipped with essential tools and equipment needed to adhere to M-214 reconditioning and bolster equipment standards. Utilizing our computerized wheel lathes, we precisely re-profile your freight car wheel sets to meet AAR specifications. Our team utilizes cutting-edge equipment to mount new or reconditioned roller bearings, offering competitive pricing for usable secondhand repairable axles or roller bearings. Additionally, our shipping and receiving areas facilitate speedy processing of orders, utilizing both truck and rail options for shipments.

TURNKEY RECONDITIONING

American Industries is an industry leader, specializing in the provision of reconditioned railcar components. We proudly distribute a wide range of innovative products from A. Stucki Company, including unit-style brake beams, side bearings, column guide wear plates, friction castings, hand brakes, and draft gears. Our extensive inventory is comprised of fully certified parts that meet your specific requirements while remaining cost-effective. With our comprehensive turnkey approach, we ensure seamless reconditioning of your railcar components.

We proudly serve railcar repair shops, as well as Class 1 and regional railroads across the midwest and mountain states. With our strategically located centralized distribution center, we have established ourselves as the go-to supplier for virtually all A. Stucki products. By consolidating our inventory and resources, we offer unmatched convenience and efficiency to our valued customers.
