

SALCO PRODUCTS, INC.

An **A.STUCKI** company

Founded in 1983, Salco Products was born from the idea of replacing theft prone metal outlet caps with ones made from plastic at a quarter of the cost. From these humble beginnings, Salco went on to become an innovator in the railcar industry by developing the first vented hatch cover for plastic resin shippers.

Over time, Salco Products extended its offering to the freight transportation industry. From components for tank cars, hopper cars, tank trucks and plant process, to specialized technical consulting services, Salco truly is a single source for innovative solutions.

Today, Salco is proud to be a dependable products and service provider to its varied customer base that globally operates at chemical plant sites, freight car manufacturers, and the rail repair network.
