

Reconditioning & Repair Services

BREATHING NEW LIFE INTO YOUR VALUABLE ASSETS

Our Reconditioning and Repair Services help leasing companies, OEM, railroads, and shippers save money by prolonging the life of your essential rail components through expert maintenance and repurposing. We breathe new life into your valuable assets. Extending the lifespan of railcars and components, we maximize your investments and minimize downtime, keeping your railcars rolling.

WHEELSETS

New and reconditioned wheelsets, bolsters, side frames, couplers/yokes, truck assemblies and more.

COUPLERS & YOKES

New and reconditioned railcar couplers and yokes.

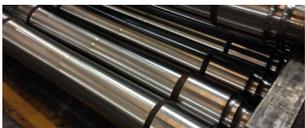

TURBOCHARGERS

Outright sales or remanufacture of EMD and GE Locomotive turbochargers.

DRAFT GEARS

Locomotive draft gear reconditioning services. Outright or repair & return of NC390 and 391 models.

AXLE MACHINING

New and reconditioned locomotive axle machining services.

ROLLER BEARINGS

Recondition all sizes and brands of roller bearings for freight car applications.

OUTLET GATES

Repair, recondition and perform upgrades to hopper car outlet gates.

We're all about making the best use of your resources.

LARGEST RECONDITIONER IN THE U.S.

We lead the nation in distributing, manufacturing, and reconditioning locomotive and freight car draft gears.

GET YOUR PARTS FAST

Using North America based vendors allows for quick 3 – 5 day turnaround times vs. the 30 day industry standard.

PROGRAM WORK

In stock draft gears can help jumpstart your changeout programs. Continuous core exchange and reconditioning will keep your project moving without delay.

Reconditioning & Repair Services

Under One Name. One Standard. One Stucki.

Our strategic unification significantly enhances our reconditioning and repair services for the rail industry. By integrating our legacy and specialized expertise, we've created a single, powerful entity dedicated to optimizing the performance and lifespan of your railcar components.

Superior Value for You

Comprehensive Solutions: From draft gear and spring reconditioning to railcar and roller bearing repair, our consolidated capabilities cover a broader spectrum of your reconditioning and repair needs under one trusted roof.

Streamlined Efficiency: By unifying our operations, we're optimizing processes, reducing lead times, and providing a more seamless experience for all your service requirements.

Deepened Expertise: We're creating an unparalleled pool of knowledge and skill that ensures the highest quality reconditioning and repair.

Enhanced Reliability: Our integrated quality control systems and combined engineering insights mean your reconditioned components will perform with greater reliability and durability, reducing downtime and operational costs.

The Future of Rail Reconditioning Starts Here

As the rail industry evolves, so does Stucki. We are committed to being your premier partner for all reconditioning and repair services, delivering the innovation, quality, and support you've come to expect, now with even greater efficiency and comprehensive expertise.
