

# Aluminum Bottom Outlet Cap

TANK CAR

**4-Inch Aluminum Bottom Outlet Cap**

Part Number: TC44BCAL6A

Aluminum Bottom Outlet Caps deliver an ergonomic, lightweight design that reduces operator injuries often caused by handling heavy and awkward steel alternatives.

The cap incorporates a field-replaceable gasket design, minimizing downtime during routine maintenance or gasket failure.

## FEATURES & BENEFITS

- Constructed of corrosion-resistant aluminum material.
- Approved for use with hazardous and non-hazardous commodities, including flammables.
- Weighs approximately 2/3 less than Carbon and Stainless Steel caps.
- Cap assembly comes available with cable, Carbon or Stainless Steel chain.
- A broad range of gasket material options allows for use in various commodities.
- Standard 5¼" railroad thread allows for application to any manufacturer's nozzle.
- Steel reinforced hex head increases grip area to reduce wrench slippage.

## OTHER STYLE CAPS AVAILABLE

Salco, a brand of A. Stucki Company, also offers bottom outlet caps in a variety of materials including Nylon, Stainless Steel, and Ductile Iron.
