

Bottom Filters And Seals

HOPPER CAR

Designed for 6" bottom outlet nozzles

Proven protection against contaminants during transit and unloading for 6" Bottom Outlet Nozzles.

FEATURES & BENEFITS

- Made from spun-bonded nylon, the 30 micron conical filter protects product purity while allowing necessary air flow for unloading.
- 6" Klean Seals protect product from dirt and contaminants accumulated inside the outlet caps during transit.
- 6" Vented Klean Seals allow wash water to drain while containing pellets.
- The Klean Seals are made from FDA-grade low density polyethylene and sold 500 per box.
- At 2 mil polyethylene, the outlet nozzle bonnet allows for a thinner sealing option but provides the same protection as the 6" Klean Seal. Sold 1000 per box.
