

Button Head Rods

TANK CAR

7/8-Inch x 4-Inch Button Head Rod

Part Number: BHR784HC1A

Used to secure domelid eyebolts to the manway nozzle, button head rods are available in multiple configurations to fit your specific application requirements.

FEATURES & BENEFITS

- Sizes available to fit any need.
- Available in both Carbon and Stainless Steel.
- Assemblies include cotter pin and washers.
- Cotter pins allow for simple maintenance.
- Significantly reduces time and labor.
- Eliminates the need for a hammer and chisel, cutting torch, and hot-work permit.

A QUICK, SECURE FASTENER

Solid rods with a standard domed head that secures with a wire formed cotter pin through a hole drilled in the opposite end. Clevis pins are used in combination with domelid eyebolts as a quick, secure, and cost-effective fastener. Stucki offers a large selection of high-quality clevis pins to meet your application needs.

Button head rods being used with eyebolts to secure manway cover.
