

# Fill-Hole Cover Gasket

TANK CAR

## 8-Inch Fill Hole Cover Gasket

Part Number: TC8VFHG201

Designed for rubber-lined tank cars, Stucki's fill hole cover gasket provides a secure, leak-proof seal between a fill-hole cover and a fill-hole nozzle.

## FEATURES & BENEFITS

- Provides secure seal for worn or dried rubber linings.
- Available in Black Natural Rubber or Viton® (made to DuPont specifications).
- Optional weep hole allows for drainage.
- Available in 6½", 8½", or 9¼" inner portion dimensions, with a 12" top rim dimension.
- Gasket's inner portion protrudes into the fill-hole nozzle keeping the gasket centered and allowing full closure.

## LEAK PREVENTION

Designed to form a tight and leak-proof seal between the fill-hole cover and the fill-hole nozzle, preventing any leakage or contamination of the tank's contents. By ensuring a secure seal, fill-hole cover gaskets help maintain the safety and integrity of the tank car during transportation, minimizing the risk of spills, accidents, and environmental damage.
