

Inspection Port Covers & Jacket Plates

TANK CAR

Bolt-On Inspection Port Cover

Part Number: TC1JP200A

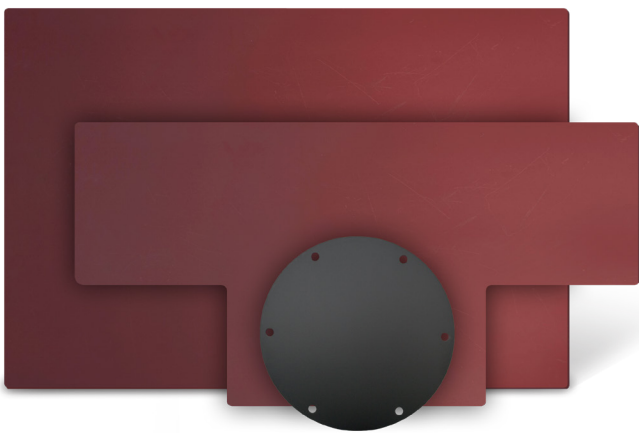

FEATURES & BENEFITS

- Weld-on and bolt-on styles available.
- Plates are contoured to fit the curvature of the tank shell.
- Jacket plates available in multiple sizes (8"x8")(7"x20")(12"x12")(14"x20")(18"x36").
- Carbon Steel jacket plates are primed for metal protection.
- Inspection port covers allow for repeated inspections of the same section of tank and insulation.
- Gasket with adhesive backing, and self drilling screws included with inspection port covers.

CONTINUED INTEGRITY AND SAFETY

Jacket cover plates for tank cars offer a cost-effective and efficient solution for repairing damage or sealing leaks on the jacket cover plate, ensuring the continued integrity and safety of the tank car during transportation of liquids or gases.

Inspection port covers provide access for inspectors to visually examine the tank's interior, facilitating regular maintenance, early detection of issues, and adherence to safety regulations.

Plates available in several shapes and sizes
