

# Magnetic Gauging Device

TANK CAR

The Magnetic Gauging Device provides accurate, dependable level indication for tank car operators by combining high strength, lightweight magnets with a durable stainless steel construction.

**Magnetic Gauging Device**  
Part Number: MGD1000

## FEATURES & BENEFITS

- Hermetically sealed rod prevents bleeding of easy-to-read numbers.
- Thicker Teflon float-bushings for longer float life.
- Float rated for 600 psig.
- All wetted components are stainless steel.
- 8" float provides increased buoyancy.
- DOT/Coast Guard complaint; approved by ABS (American Bureau of Shipping).
- AAR Approval # E202146.

## ACCURATE LEVEL INDICATION

High-tech magnets are stronger and lighter, promoting durability and longevity. Standard float will accommodate a commodity with a specific gravity as low as .49. Single float systems available to accommodate a specific gravity as low as .41. Tri-colored rod facilitates reading when the car reaches critical fill level.
