

Midrails and Toe Boards

TANK CAR

Midrails and Toe Boards boost platform safety with easy, bolt-on installation and FRA-compliant protection. They help prevent worker falls and protect against dropped tools.

FEATURES & BENEFITS

- Meets FRA Bulletins MP&E 98-14 & 00-06 for safety and securement.
- Bolt-on design simplifies retrofit installation.
- Guards against worker falls and platform edge slips.
- Toe boards prevent dropped tools and debris.
- Designed to match your fleet and platform dimensions.
- Powder coat or color-matched to your fleet.
- Carbon steel bolts with stainless top lock nuts.
- Fits varying platform widths; minor trimming/drilling may be required.

ESSENTIAL PLATFORM SAFETY

Midrails and toe boards are essential components of a safe work environment on elevated platforms. They significantly reduce the risk of accidents, helping to protect both operators and personnel working nearby. Prioritizing these safety features demonstrates a commitment to regulatory compliance and, more importantly, to the well-being of your workforce.
