

Outage Markers

TANK CAR

Outage Marker

Part Number: OM1S

Stucki designed Outage Markers provide a simple and convenient visual indication used to denote the maximum safe filling level of the liquid within a tank car.

FEATURES & BENEFITS

- Designed to be welded just inside the manway opening.
- Constructed of corrosion-resistant 316 Stainless Steel.
- Certified and marked for traceability to ASTM A-262 Practice B.
- Lines, text and numbers are machine engraved for easy reading.
- Provides a clear visual reference for maximum fill capacity.

PREVENT OVERFILLING INCIDENTS

By clearly indicating the allowable fill level, outage markers help operators and loading personnel adhere to safety regulations and prevent overfilling incidents. Additionally, outage markers assist inspectors in visually verifying that the tank is loaded to the appropriate level before the train departs, enhancing safety and compliance during transportation.
