

# Quick-Inspect Safety Vent

 TANK CAR

Chemical and weather resistant, this lightweight Quick Inspect Safety Vent design provides a number of improvements over conventional models and allows easy inspection and cleaning of both sides of the rupture disc.

## FEATURES & BENEFITS

- AAR approved.
- Accepts standard rupture disk styles.
- Threaded closures allow easy access for rupture disk inspection and cleaning.
- A choice of body material options to accommodate any service.
- Available in Noryl, Ryton, Stainless Steel and Stucki Polyethylene.
- Sold with or without a surge protector.

## OVERPRESSURE PROTECTION

Provides dependable overpressure protection by releasing excess internal pressure before it reaches unsafe levels. Its design maintains controlled venting while preserving the integrity of the rupture disc, which helps prevent damage to the tank car and reduces operational risk.

## AAR COMPLIANT

The Quick Inspect Safety Vent is fully compliant with AAR requirements, ensuring it meets the industry's established standards for safe and reliable tank car performance.
