

Seal Pins

TANK CAR

Seal pins are a convenient and versatile type of pin that are easy to use and do not require any tools to apply or remove. Making it an easy option for locking various components, keeping them secure while in transit.

FEATURES & BENEFITS

- Quickly and easily lock a closure, keeping it secure while in transit.
- Various sizes in stock and available for immediate shipment.
- Known for their smooth operation as well as long life span.
- Available in Carbon Steel and Stainless Steel.
- Pins available in thicknesses up to 1".
- Pins available in lengths up to 17".

CABLE SEAL READY

The hinged locking device (flapper) has an opening for a cable seal, allowing for an additional layer of protection on closure.

CHAIN INCLUDED

Included chain length keeps the pin assembly near closure points and avoids misplacement.
