

Waste Fume Scrubbers

PLANT PROCESS EQUIPMENT

Waste fume scrubbers are suitable for chemical producers, metal finishing semi-conductor manufacturing, food industry, and other operations generating fumes and gases.

FEATURES & BENEFITS

- Removes acid fumes from various processes.
- Removes SO₂/NO_x and solid particle matter from boiler fuel gases.
- Low maintenance; high efficiency design.
- Unit is corrosion resistant.
- Wide range of sizes and CFM ratings available.
- Blower optional.

DEVELOPMENT AND ENGINEERING EXPERTISE

Backed by Salco's extensive experience in freight transportation and transloading applications, and as a brand of A. Stucki Company, Hazarsolve applies its deep knowledge of corrosive environments to design, engineer, and build some of the most efficient waste fume scrubbers available.

Each unit is tailored to meet specific capacity, mobility, and facility integration requirements and is constructed to the highest quality standards for exceptional corrosion resistance in the most demanding conditions.
