

# Combination Spark-Proof Socket

TANK CAR

**Bronze Eyebolt Socket**

Part Number: SKT781NS34A

Stucki's bronze eyebolt socket is designed to aid in operations subject to explosion hazards and where spark-proof tools are utilized.

**Torque Calculator Available**

Please view Stucki's website for more information

## FEATURES & BENEFITS

- 3/4" drive combination socket will work with both 1-5/8" and 1-7/16" nuts (7/8" and 1" standard eyebolts).
- For use on standard tankcar manway eyebolt applications.
- Works with heavy hex nuts and heavy square nuts. It is recommended that only a manual wrench be used with our socket.
- Saves time and labor. Handles both hex and square nuts, replacing 4 sockets with 1.
- Deep-well design. The overall working depth of the socket with Insert in place is 5".

## PREVENT FIRES AND EXPLOSIONS

Spark-proof sockets are important to use in the freight rail industry because they help to prevent fires and explosions. Freight trains often transport flammable materials, such as oil, gas, and chemicals, and a spark from a conventional socket could ignite these materials, causing a serious accident.
