

Trough Cover Lift Assist

HOPPER CAR

Trough Hatch Cover Lift Assist

Part Number: E54628

Trough Hatch Cover Lift Assists reduce the effort required to open and close heavy hopper car covers by over 60%. It easily attaches to existing hinges with no hot work or major modifications. Built for durability, it enhances safety, ease of use, and cover longevity.

FEATURES & BENEFITS

- No hot work required.
- Installs with minimal labor.
- Reduces lift effort by 60%+.
- Fits most trough cover designs.
- Soft-close extends cover life.
- Lowers back and knee strain.
- Prevents pinch-point injuries.
- Available in Stainless Steel.

SAFETY FOCUSED

Operator safety is at the core of the Lift Assist's design. By drastically reducing the physical force needed to lift and close heavy trough hatch covers, the system minimizes the risk of musculoskeletal injuries and repetitive strain among railcar operators.

The smoother motion and soft-close functionality also help prevent sudden drops or impacts, lowering the risk of hand and finger injuries during operation. The result is a safer, more ergonomic solution that improves working conditions while maintaining the high performance expected from a Stucki product.
