

PLASTIC PELLET RESIN CAR

Components engineered to exceed the
everyday demands of the railcar industry.

One Name. Endless Rail Solutions.

Unified under the A. Stucki Company brand. Everything you need, all in one place.

A. Stucki Company was established in 1911 by Arnold Stucki, a talented Swiss engineer who moved to America and thrived in the rail industry. His innovative side bearing design stabilized rail cars and became an industry standard, and by the 1950s almost all North American railroad companies used Stucki roller side bearings.

Today, the entrepreneurial spirit and engineering prowess of Arnold Stucki lives on in the company that bears his name. In recent years A. Stucki Company has focused on growth and diversification, acquiring accomplished suppliers of machined components, springs, bearings and other products, as well as critical manufacturing and logistics services.

Hatch Covers

Salco Products holds 95% of the round Hatch Cover business in the industry, as well as a comprehensive knowledge base of existing fleet and new car application requirements. With over a million covers in service, the Salco Products Hatch Cover has a proven record of performance.

Non-Vented Hatch Covers

TOP OF CAR

08

Hatch Covers

Salco's Non-Vented Hatch Covers provide maximum protection for your product with its superior seal, high impact design, and UV stabilized material.

CUSTOMER BENEFITS

- Lightweight ABS
- Seamless and glueless gasket
- Superior seal
- Lockable hardware
- Conversion arrangements available

PROVEN RECORD OF PERFORMANCE

Significantly lighter than steel and fiberglass hatch covers at only 22lbs. UV stabilized material is effective in all climates and weather conditions. With millions of our covers in service, the material quality and flawless design speak for itself.

With conversion arrangements available for every major car manufacturer, Stucki can meet all of your circular hatch cover needs.

Vented Hatch Covers

TOP OF CAR

The concept of dual vent hoods to promote the safest and most efficient venting of a railcar has been the cornerstone of the vented hatch cover since its initial design in 1988.

CUSTOMER BENEFITS

- Lightweight HDPE
- Seamless and glueless gasket
- Superior seal
- Saves time, labor, and reduces accidents
- Conversion arrangements available
- Eliminates roof implosions

PROVEN RECORD OF PERFORMANCE

As the original designer behind the most risk-free way to vent a hopper car, Salco Products takes pride in its vented hatch cover. With millions of our covers in service over the past 20 years, the material quality and flawless design speak for itself.

Wind-Tunnel tests conducted by The University of Toledo prove Salco covers keep out contaminants. Full testing info can be found at stucki.com/hatchcover.

Hatch Cover Screens

TOP OF CAR

20

Hatch Covers

Retrofit your existing Salco hatch covers with our redesigned pellet screen. Removing or replacing dirty screens has never been easier with this patented snap-on tab design.

PRODUCT DETAILS

- Durable (Polypropylene), one-piece design
- Allows for quick, easy removal for cleaning or replacing. No more snap-in hooks or rivets to deal with
- Easily installs over six hatch cover gasket tabs
- Hatch cover gasket provides further securement
- Patented design

INSTALLS EASILY

To install, align and gently press down until screen snaps in place. For cleaning or replacing, remove the gasket. Lift the screen at each tab location until it clears the gasket tabs and then pull away from cover.

Outlet Gates

Stucki offers a wide variety of outlet gate options including Salco's 4590CV 5131 conversion gate. Whether you are seeking new gates, reconditioned gates, or repairs to existing gates, Stucki has an option for you.

Outlet Gates

BOTTOM OF CAR

Stucki converts gates with outdated functionality into gates that operate more dependably, extending the service life of the original equipment.

CUSTOMER BENEFITS

- Rugged low maintenance design
- Strong flat flange allows for great seal
- Valves easily open and close under load
- Lightweight Aluminum construction
- Allows for unloading from either side

OEM GATES ALSO AVAILABLE

Stucki also offers a wide variety of OEM gates along with an extensive list of replacement parts for each style of gate. No matter what style car or commodity, rest assured Stucki has the gate you need in stock and ready to ship.

6-Inch Vented Outlet Cap

BOTTOM OF CAR

The pioneers behind the Vented Hatch Cover announce the latest innovation in the plastic pellet car component market.

CUSTOMER BENEFITS

- Prevents pellet loss; reducing risk of fines
- Improves operator safety; lowering risk of accidents
- Saves time during unloading process
- 30-micron filter keeps debris out; lets air in
- Aids in preventing moisture build-up in draft tube
- Vent hood directs airflow, enhancing unloading vacuum rate

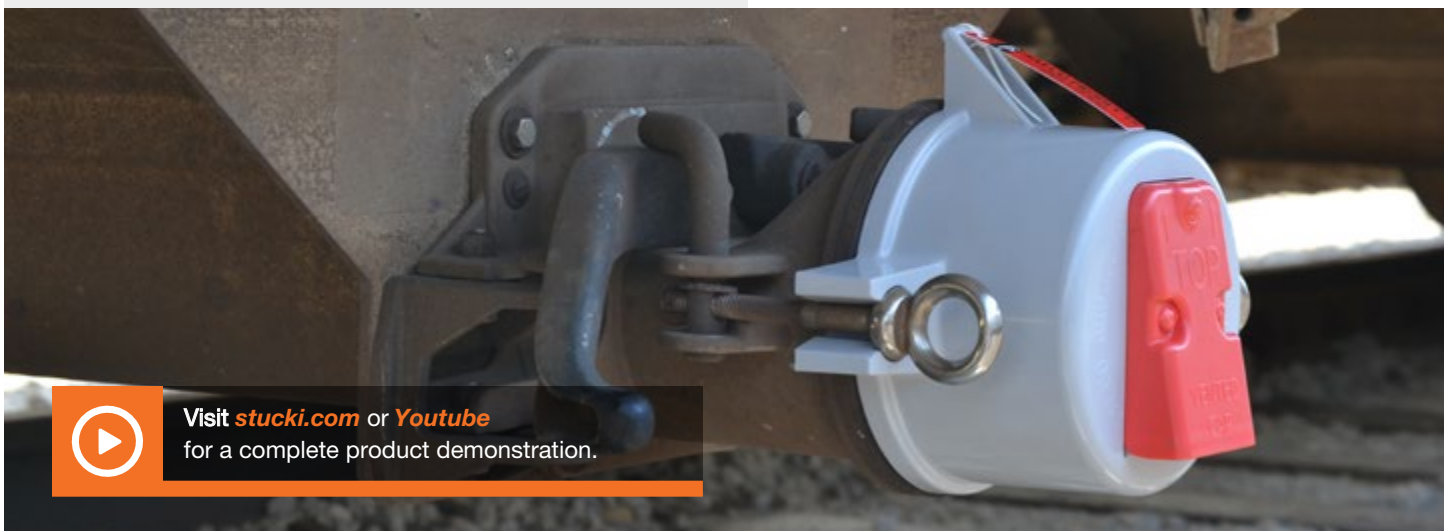

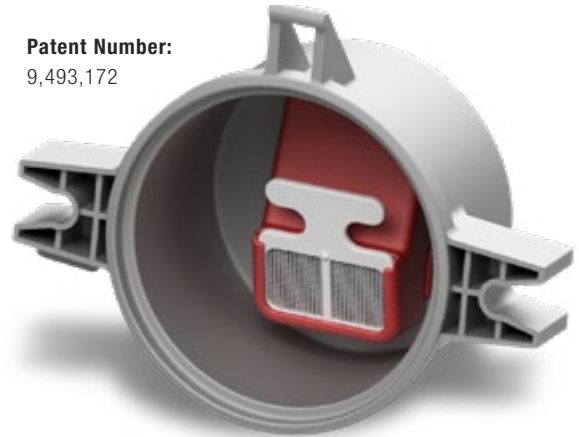

PURPOSE-BUILT APPROACH

Salco Products Vented Outlet Cap presents multiple advantages for pneumatic gate operators and car owners. As a proud member of Operation Clean Sweep®, this component was designed with OCS® initiatives and general operator safety in mind.

This vented cap eliminates the unsafe practice of unloaders crawling under cars to remove a cap from the opposite side, decreases the risk of operator injury as well as pellet loss.

Patent Number:
9,493,172

Visit stucki.com or [Youtube](#)
for a complete product demonstration.

Service Center

The Stucki Service Center located in Houston, TX, repairs, reconditions and performs upgrades to hopper car outlet gates. With certified welders that meet AAR requirements, this service saves our customers thousands of dollars each year by helping them delay the purchase of new gates.

Outlet Gate Repair / Reconditioning

BOTTOM OF CAR

A. Stucki Company provides a comprehensive 6-step repair & reconditioning process to all types of gates. Our welders are certified and meet AAR MSRP C-II M1001 (freight car design, fabrication and construction) which states that all welding will be in accordance with the AWS D.15 and specifically D.15.1 that governs all welds on railcars.

1

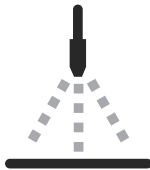

Thorough inspection of gate determines degree of repair and reconditioning required.

2

Gate is totally dismantled prior to initiating required repairs and reconditioning.

3

Glass bead blasting and power washing with hot water removes surface grease and grime.

4

Full buffing and cleaning removes any remaining debris and surface scratches.

5

After detailed inspection to ensure quality, the gate is reassembled using new nuts, bolts, washers, gaskets and caps.

6

Repaired, refinished, reassembled, fully inspected, approved for resale, and ready for delivery.

Outlet Gate Repair/Conversion

BOTTOM OF CAR

Stucki's Service Center Offers Complete Outlet Gate Repair/Reconditioning/Conversion Services

ACF 5135 & 5235 GATES

- Eliminates gap that causes product contamination.
- Gap is welded shut, which eliminates pellet entrapment.

MICRO-MATIC CONVERSION TO SALCO KAM-OP

- Salco's "Kam-Op" conversion eliminates "jumping time".
- Kam design replaces loop bracket/rack and pinion.
- Extended handles prevent "pinch points."

ACF 5131 CONVERSION TO SALCO 4590-CV

- Salco's 4590-CV conversion eliminates binding/seizing of control valve caused by pellet entrapment.
- Elimination of bail assembly prevents "pinch points".
- Limiter Pin reduces 90-degree handle turn to 45 degrees.

As well as reconditioning Edsco, Ellcon and other gates, Salco's Service Center also reconditions hatch covers

Our welders are certified and meet AAR MSRP C-II M1001 (freight car design, fabrication and construction) which states that all welding will be in accordance with the AWS D.15 and specifically D.15.1 that governs all welds on railcars

Loading / Unloading Aids

Stucki's Loading and Unloading Aids offering can complement your plants recommended loading and unloading process to keep operations running efficiently.

Containment Trays

BOTTOM OF CAR

Lightweight, heavy-duty containment trays fit securely to the rail to provide a simple and effective means of controlling product loss.

CUSTOMER BENEFITS

- Lightweight
- Durable
- Catch product loss during unloading
- Notch keeps tray on track
- Optional cover and filter (for blue trays only)

CONTROL PRODUCT LOSS

Help keep spills off the ground with lightweight, heavy-duty containment trays. Keeping your yard clean and free of contamination, these trays are rigid and capable of being lifted when full without risk of wobble.

Containment Tray Large
Part Number: CT100L

Containment Tray Small
Part Number: CT200

Part numbers referenced are for images shown

Klean-Out Paddle/Pole Assembly

TOP OF CAR

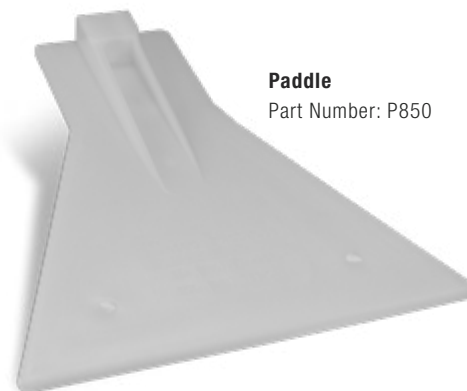

Stucki's Klean-Out paddle/pole assembly provides a quick and easy means of cleaning the interior of hopper cars which have retained product during or after normal unloading.

CUSTOMER BENEFITS

- Made from durable polypropylene
- FDA approved for use in food grade applications
- Telescoping fiberglass pole extends to 16 feet, allows easy access to all interior areas
- Available as assembly or individual pieces
- Rounded paddle corners protects lining and fabric

EASY-TO-USE CLEANING AID

Scraping the walls of a car shouldn't be more difficult than it already is. Using tools designed for this purpose will help you save valuable time and effort. Rest assured this paddle is designed with the flexibility and durability to tackle any job inside your railcar.

20 Inch Weather Shield

TOP OF CAR

Weather shields provide effective protection of commodity during inclement weather such as rain and snow.

CUSTOMER BENEFITS

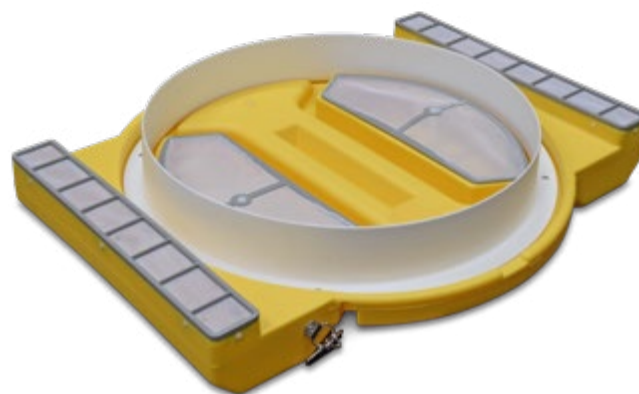

- Constructed of durable, lightweight HD polyethylene
- Portable - can be moved from car to car or from opening to opening
- Shoulder strap keeps hands free
- Provides dual filtering; various filter media available
- All screens, external & internal, are replaceable
- Works with all resins and food products
- Bright yellow color for high visibility

PROTECTION DURING INCLEMENT WEATHER

Railcars must be ready for any and all weather conditions. The 20-inch Weather Shield remains the strongest line of defense against moisture and other unwanted elements from reaching a railcar's commodity when unloading.

20-Inch Cover
Part Number: VPHC20RC

Part numbers referenced are for images shown
View Stucki website for full product offering at:

Hose Supports

BOTTOM OF CAR

Keep loading and unloading hoses off the ground with hose supports for railcars and trucks.

CUSTOMER BENEFITS

- Made of durable, lightweight HDPE plastic
- Keeps control valves clean during clean out
- Wide base, will not tip over
- Saves time, labor, and reduces accidents
- Strap fits a variety of hose sizes
- Available with caster wheels

HELPING ELIMINATE CONTAMINATION

Protect your hose from unwanted dirt and damage by keeping it off the ground. Hose supports were designed with the operator in mind, elevating the hose for easy access to gates along with decreasing tripping hazards.

Hose Support
Part Number: HS345

Hose Support With Casters
Part Number: HS345W1

Discharge Gate Adapters

BOTTOM OF CAR

Quickly and easily connect your product hose to a railcar with 6-Inch Pellet Gate Discharge Adapters.

CUSTOMER BENEFITS

- Made from flexible polyurethane
- Lightweight and durable
- Easy to install; push-on design
- Male or female connections available
- Universal fit
- Works for all vacuum pneumatic gates

UNLOAD WITH EASE

These durable but lightweight fittings make connecting a breeze with its push on design and kammed connections.

6-Inch Unloading Adapter
Part Number: UC6A

4-Inch Unloading Adapter
Part Number: UN64A

Exhaust Filter System

TOP OF CAR

54

Loading / Unloading Aids

Control dust while loading and protect the atmosphere and operators from product contaminants/irritants.

CUSTOMER BENEFITS

- Various sizes / filter fabrics available
- Keeps product from escaping into the environment
- Saves time and money by preventing messy clean-ups
- Protects your worker's health by filtering the air they breathe
- Adaptable to loading powder, plastics, cement, and other dry solids
- Filter bags available in 36-inch and 72-inch lengths with durable 30-micron spun-bonded nylon.

PROPERLY FILTERED LOADING AREA

Eliminate the messy dust clouds caused when loading dry goods with an Exhaust Filter System. Easily attached to the hatch ring, filters can be used repeatedly and washed when soiled. Protect the operators by keeping the air they breathe contaminate free.

Throat Liner Assembly

Rail / Yard Accessories

A. Stucki Company carries a wide variety of parts to aid in moving your product while keeping it contaminant free. From filters and seals to various loading/unloading aids, Stucki can help. Be sure to check out the Rail Safety and Maintenance section that has everything to keep you current with OSHA regulations.

Top Filters and Seals

TOP OF CAR

Proven protection for hatch cover openings against contaminants during transit and unloading.

CUSTOMER BENEFITS

- Available in a variety of sizes
- Made of high strength polyethylene
- Keeps insects, bees and other contaminants out of the load
- Filters allow the railcar to breathe, reducing condensation problems
- Filters available in 30-micron or 600-micron
- 600-micron filter can be used to hold fumigant packs/strips
- 30-inch holder available for larger openings; 20-inch framed filters snap right in

ALLOW VENTILATION WHILE KEEPING CARS SANITARY

Help keep contaminants from making their way into the hopper car, while still allowing clean air in with a hatch filter. This is crucial when trying to avoid unwanted moisture and mold build up. Protect your commodity with a variety of filters and seals designed for hatch cover openings.

Grit Dust Recovery Bags

BOTTOM OF CAR

A simple and efficient means of collecting and removing unwanted residues produced during the blast process.

CUSTOMER BENEFITS

- Suitable for a variety of recovery systems
- Made of durable, lightweight synthetic weave
- 21 cubic-foot capacity; holds up to 2,100 pounds
- Flexible, easy-to-secure closure opens to 12-inch
- Fits a variety of nozzle sizes and shapes
- Ideal for repair shops, paint shops, car builders and cleaning facilities

DESIGNED FOR EASY CLEAN-UP

The grit blasting process can produce large amounts of dust and debris from the abrasive product being blasted. This debris, in large amounts, can be quite heavy and require a collection method designed for this purpose. Grit Dust Recovery Bags are a suitable solution for efficiently collecting and disposing of waste produced by the car blasting process.

Clearance Markers

BOTTOM OF CAR

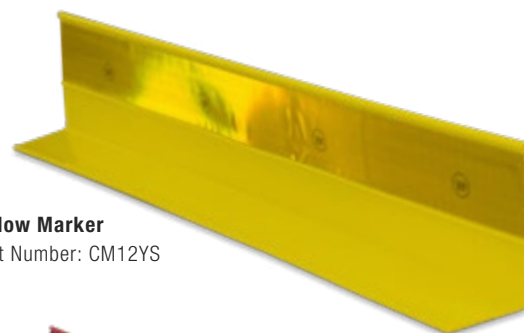

Flexible, durable, reflective clearance markers that help prevent clearance point / crossover fouling accidents.

CUSTOMER BENEFITS

- Improves nighttime visibility
- Helps prevent accidents
- Easy to install
- Durable, built for extreme conditions
- Flexible, does not present a tripping hazard

CLEARANCE POINT / CROSSOVER FOULING ACCIDENTS

These accidents are common and mostly caused by limited or lack of proper clearance markers. They typically occur at night in which there is no, or limited, visibility. Currently, there are no standards in place for night visibility clearance markers and some have attempted to use “home-made” methods. These methods are great for temporary use, but over time these devices will not last. Paint fades, markings are easily covered by dirt and debris, PVC markings eventually break due to weather, and with no large-scale manufacturing, these “home-made” devices can be costly to maintain.

Car Body

The physical demands of freight transportation make running gear components and running boards the number one maintenance cost item. Stucki has these and other common running gear parts available and ready to ship.

Platform / Running Boards

TOP OF CAR

Grating ruggedly constructed of galvanized steel providing an optimal anti-skid surface where it is needed most.

CUSTOMER BENEFITS

- Durable Galvanized Steel
- Anti-skid patterns prevent slipping
- Designed specifically for railcar applications
- Saves time, labor, and reduces accidents

VARIETY OF PATTERNS AVAILABLE

Safety atop a railcar is of utmost importance. Having a stable non-slick surface to walk on will help to prevent dangerous accidents from occurring. Galvanized Steel running boards provide a stable surface for operators to work even in less than ideal conditions.

ORALITE® Conspicuity Material

BODY OF CAR

Stucki offers the rail industry ORALITE® conspicuity material, a high-visibility reflective tape that can greatly improve visibility and safety at night, in bad weather, and in poorly lit environments. ORALITE® conspicuity material is unmatched for recognition and safety.

CUSTOMER BENEFITS

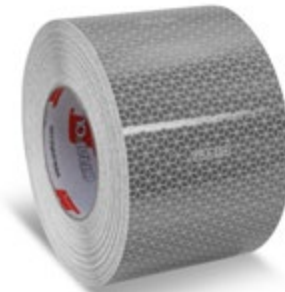

- Extremely durable, impact and crack resistant
- Single ply - .008 thin; no open-cell construction
- Easily adheres to flat and curved surfaces
- Retains reflective ability even when wet
- Meets all D.O.T. specs

MICROPRISM CONSTRUCTION

Cube-corner microprism retro-reflective elements are integrally bonded to a flexible, weather-resistant UV-stabilized polymeric film.
