

Non-Metal Blind Flange

TANK CAR

6-Inch Non-Metal Bottom Outlet Blind Flange

Part Number: TCBFNM100A

The Non-metal Blind Flange serves as a secondary closure for bottom outlet valves between unloadings, protecting them with a lightweight non-metal design that deters theft while delivering secure, reliable sealing.

Raised-face sealing surface ensures a dependable, tight seal.

FEATURES & BENEFITS

- Lightweight non-metal construction reduces handling effort and operator strain.
- Black non-metal material helps deter theft while also offering corrosion resistance.
- Accepts a 1-inch NPT plug available in multiple material options to meet customer needs.
- Integrated cable seal provisions and chain attachment point support secure installation.
- Raised-face sealing surface ensures a dependable, tight seal.
- 9.5-inch, 4-hole bolt circle provides consistent fit and easy installation.
- AAR Approved - Approval #E262106

PREVENTS LEAKS AND SPILLS

Blind flanges help offer an additional line of defense against damage and non-accidental releases by providing a secondary barrier to contain the contents of the railcar. Additionally, the tight seal created by the flange helps to prevent any leaks or spills from occurring, even in the event of an accident or impact.
